EXPERIENCE

Coding Club, Assam Engineering College , *Web Wing Coordinator* 08/2025 – 07/2026

- Developed CodeWar 7.0 , an immersive 3D website for the college's annual coding event (Next.js, Three.js, React Three Fiber, Tailwind CSS), with route-synced camera flights driven by wheel, swipe, and keyboard input, procedural idle camera motion, and device-adaptive rendering for smooth mobile performance
- Designed a tamper-proof, server-gated countdown API for the scheduled release of hackathon problem statements, serving ~50 concurrent participants with zero early access
- Led 3 sessions mentoring 100+ juniors in web development and data structures & algorithms

Technology Innovation Hub, IIT Guwahati , *Full-Stack & Edge Systems Intern* 07/2025

- Built ODStream , a real-time multi-user object detection platform (React, Flask, Socket.IO, YOLOv5/v8), streaming live video over LAN with camera and recording state synced across clients via WebSockets
- Implemented a Jetson Nano edge server (Intel RealSense SDK) for an underwater drone, serving MJPEG to the host and gating on-device YOLO inference to active recordings to conserve compute
- Engineered a pluggable camera layer for local webcams and remote MJPEG/HTTP feeds with threaded frame buffering; logged only detections stable across 3 consecutive frames to suppress flicker and duplicates
- Achieved real-time desktop inference at 12–14 FPS (CPU) and 15–18 FPS (GPU) in benchmarks

PROJECTS

create-pyro , *Opinionated Full-Stack Monorepo Template* 10/2026

- Published an npm CLI that scaffolds a runnable 5-package full-stack monorepo (Hono API, React Router SSR, Drizzle, Better Auth, Docker) in one command, with auto-generated secrets for zero manual setup
- Automated GitHub Actions checks that scaffold a fresh project, run its lint, typecheck, 22 tests, and build, and boot the production Docker stack to catch regressions before publishing

AECFolio , *Student Information System & CV Generator* 04/2026

- Developed a full-stack student-records platform (Turborepo with Hono API, React Router SSR, Puppeteer PDF worker) with faculty-verified records and capability-based access control tested across every role–endpoint pair
- Built a bulk CV export pipeline on a Postgres job queue (SKIP LOCKED, crash-resumable) feeding a pooled-tab Chromium worker; cut per-PDF render time from 1.2s to ~40ms, exporting 500 CVs in 17.9s
- Added checksum caching to skip re-rendering unchanged CVs, re-exporting 480 CVs in 1s vs 14s cold
- Hardened the data layer with a normalized PostgreSQL schema (Drizzle), soft deletes, trigger-enforced immutable audit logs, and magic-byte-verified uploads; 440 tests on real Postgres and S3

EDUCATION

Assam Engineering College , *B.Tech in Computer Science & Engineering* 09/2023 – 05/2027 (expected)

- CGPA: 8.27/10 (through 6th semester)

SKILLS

- **Languages:** TypeScript, JavaScript, Python, C++, SQL
- **Frontend & Apps:** React, React Router, Next.js, Tailwind CSS, Three.js, Electron, React Native, Extensions (MV3)
- **Backend & Data:** Node.js, Hono, Flask, Socket.IO, PostgreSQL, Drizzle, Better Auth, Puppeteer, S3 (AWS, Garage)
- **AI & Machine Learning:** YOLOv5/v8, OpenCV, NumPy, pandas, scikit-learn, LangChain, LangGraph
- **Systems & Edge:** gem5, Linux memory management (NUMA, cgroups), Jetson Nano, Intel RealSense SDK
- **Tools & DevOps:** Git, GitHub Actions, Docker, nginx, Turborepo, Vitest, Playwright

ACHIEVEMENTS

GATE (CS) 02/2026

- Secured All India Rank 1969 out of 211,000 candidates (top 1%) with a score of 649/1000

INTERESTS

- **Chess:** Reached a peak rating of 1950 (top 0.5%) in Chess.com Rapid
